The House joint resolution extending the appropriations up to and including the lith of August was passed, and in connection with it the status of the general tal appropriation bills was given by Mr. Coekrell, chairman of the Committee on Appropriations. PRINTING APPRENTICES. The only committee amendment to the bill which net with any opposition was the inserting of a new section authorizing the Public Printer to employ apprentices, not exceeding twenty-five at any time. This amendment was opposed by Mr. Peffer in the interest of the typographical unions, and was advocated by Mr. Manderson, who characterized the rule of

derson, who characterized the rule of labor societies forbidding the employment of apprentices as a species of tyranny of the mot objectionable character.

Mr. Palmer expressed autonishment at Mr. Peffer's opposition to giving the boys a chance of learning a trade. The amendment was agreed, and the bill was passed, and a conference asked-Messrs, Gorman, Ransom, and Manderson being appointed conference on the part of the Senate.

Mr. Allen, the Populiet from Nebraska introduced and had referred to the Committee on Finance a bill having for its title "A bill for the relief of the soveral States of the Union, and for the purpose of distributing among the States, according to population, of \$50,90,000 in Transury notes, to be issued for the purpose, and to be used for the relief of the worthy poor."

Repayment to the government is to be secured by State bonds bearing 29 percent interest, payable in not less than three nor more than ten years after date.

The Senate, at 4:59, after a short executive session, adjourned.

It is apparent, even to a casual observer, that the House Democrats have determined not to accept the Senate bill without some concession. Three of the four House conferrees—Messrs. was announced to the full committee.
The conferrees then adjourned subject to

Thursday.

None of the House conferrees signed the call for this caucus, and they are dis-posed to regard it as a reflection upon them. This proposed caucus was not, however, touched upon at the tarial con-

ate. Mr. McMillin, the remaining mem-ber of the House committee is more liberal, and is willing to meet the Senate conferrees in a more conciliatory spirit.

PRESIDENT AND SPEAKER.

The House conferrees know, however, that their position has the endorsement of the President and Speaker Crisp, as well as that of a majority of the leading members of the party on the floor, and this is great encouragement to them. Last week there was considerable talk of a recession on the part of the House, and the acceptance of the Senate bill as being better than no bill. These sentiments were expressed again in the House to-day, but not to the same extent as formerly, while it was significant that those who insisted upon the House bill were more determined than ever.

Notwithstanding the apparent hopelessness of the deal-lock there are plenty of members in both houses who predict that a tariff bill will be agreed upon and passed. They are not, however, willing PRESIDENT AND SPEAKER.
